PROFESSIONAL SUMMARY

Advanced Systems Engineering student (Universidad ORT Uruguay, 7th semester) focused on full-stack and backend web development. Strong foundation in Java, C++, and C, with hands-on experience building production-grade systems using Next.js, Node.js, PostgreSQL, Git/GitHub, and Docker. Skilled in relational database design, query optimization, and REST API architecture. Seeking to join a technical team as a Full-Stack or Backend Developer.

KEY SKILLS

- Languages: Java, C++, C, JavaScript (ES6+), TypeScript, PHP, SQL, Bash, Ada
- Web Technologies: React, Next.js, Node.js, HTML5, CSS3, REST API design
- Tools & DevOps: Docker, Git, GitHub, Prisma ORM, Postman, Vercel
- Databases: PostgreSQL, relational modeling, query optimization
- Software Engineering: Algorithm optimization (Big O complexity), data structures, performance analysis
- Practices: Debugging, Clean Code, Agile collaboration

PROJECTS

Turno.uy — Multi-Tenant SaaS Booking Platform | Personal Project Oct 2025 – Present

Live: <https://turno.uy/> | **Code:** <https://github.com/AugustoFerrari1/Turno.uy>

- Architected a multi-tenant SaaS platform validated with 2 independent business tenants, each with isolated branding, scheduling, and user configurations, using Next.js 16, TypeScript, and PostgreSQL
- Integrated 6 third-party APIs (Twilio/WhatsApp, Google Calendar, MercadoPago, Resend, Cloudinary) to automate booking reminders, payment processing, and calendar synchronization
- Built and validated a no-account booking flow across 3 channels (direct link, QR code, embeddable widget), confirming end-to-end data integrity from an external test page through to the database and admin dashboard
- Optimized backend query performance by parallelizing independent, non-dependent await calls (Promise.all) instead of sequential execution, reducing unnecessary blocking time in API routes
- Designed the full admin dashboard (scheduling, staff, clients, cash register, financial reporting, analytics) using Prisma ORM and PostgreSQL relational modeling

EDUCATION

Systems Engineering | Universidad ORT Uruguay Mar 2023 – Present

Currently in 7th semester

PHP & MySQL Course Jan 2022 – May 2022

Intensive training in database design, modeling, and administration

ADDITIONAL INFORMATION

- Languages: English (B1+)
- Availability: Flexible hours / Part-time
